Lab2_Task2_"About My Buddy!" HTML Pair Activity

Objective: Pairs of students will get to know their partner better and then create a webpage highlighting fun and interesting details about their partner. It's like writing a short biography, but for fun!

Requirements:

1. **Getting to Know You**:
   - Pairs of students spend about 10 minutes interviewing each other. They can ask about hobbies, favourite foods, a funny childhood memory, etc.

2. **Webpage Content**:
   - **Heading**: Create a heading with your partner's name (or nickname).
   - **Photo**: Include a picture of your partner. It can be a funny pose or even an avatar or whatever they are comfortable with if they prefer not to use a real photo.
   - **Fun Facts List**: Make a bullet-pointed list of fun facts about your partner based on the interview. Include at least 5 facts.
   - **One Highlighted Story**: Detail one particularly funny or interesting story they shared.
   - **Signature**: End the page with a fun "Webpage created by [Your Name]" line.

3. **Design Elements**:
   - **Choose a Background**: Work together to choose a background colour that your partner likes.
   - **Stylize the Text**: Pick a fun font for the heading and another for the body text.
   - **Add Emojis**: Integrate a few emojis that resonate with the details you've learned about your partner.

Presentation:
   - After both partners are done, you'll take turns presenting their pages to each other. It's like revealing a fun, digital gift about each other!

YOU ARE FREE TO STRUCTURE AND DESIGN THE WEBPAGE AS YOU WANT 😊
